

A FEW FACTS ABOUT LABOR DAY®

by Dan Pemble, Kissimmee, Florida

- **In 1894 the US Congress passed legislation designating the first Monday in September as Labor Day.**
- **As it turned out, in the year 2025, the first Monday was on September 1st. In 2026, the first Monday in September will be September 7th and in the year 2027 it will be September 6th! So, it can be seen that the specific calendar date for the first Monday in September is always variable.**
- **It just so happens that the year 2025 Labor Day date of September 1st coincided with the meteorological (based on temperature trends) date for the last day of summer and first day of fall. [The astrological (based on the direction of the sun and angle at which it strikes earth) date for the last day of summer is actually September 21st and the first day of fall is on September 22nd.]**

**WHATEVER THE DATE IS FOR LABOR DAY, JUST ENJOY
A BREATHER DURING THIS HOLIDAY PERIOD TO
SIMPLY KICK BACK AND RELAX!**
